Turnover 2017:

In this section, you are invited to complete two types of turnover.

1) the turnover generated in Belgium⁽¹⁾ in the field of electronic communications networks or services.

in euros

Are these activities exploited with a profit-making objective?

Yes

No

Article 8 §1, of the Royal Decree of 7 March 2007 on the notification of electronic communications services and networks

The relevant turnover is the turnover generated in Belgium in year t-1 in the field of electronic communications networks or electronic communications services, except for the turnover relating to the activities described in Article 8, §2. The operator shall communicate to the Institute the relevant turnover of year t-1 by 30 June of the year t. The operator provides all information justifying the amount declared, upon simple request of the Institute. In case of absence of communication or of incomplete, erroneous or fraudulent communication of the data useful for determining the relevant turnover, or if the requested information is not transmitted, the Institute may use any available data – including the operator's global turnover – to determine the amount of the annual fee.

2) the turnover of the retail activities carried out in Belgium⁽¹⁾ in the field of electronic communications (in the context of the financing of the Office of the Ombudsman)⁽²⁾.

in euros

Article 45bis, §4 of the Act of 21 March 1991 on the reform of certain economic public companies Companies referred to in Article 43bis, §1 of this Act shall communicate to the Belgian Institute for postal services and telecommunications, by 30 June of each year at the latest, the turnover recorded during the previous year for each of the activities falling within the scope of the Office of the Ombudsman. in euros

(1) This includes the amounts charged abroad for services provided in Belgium.

(2) It includes the activities provided to an end-user of sale or resale of electronic communications services or networks, the making, sale or distribution of a directory, the provision of a telephone directory enquiry service, the operating of electronic communications systems, the provision of cryptography services to the public, the provision of other electronic communications activities and the provision of broadcasting and/or radio transmission services

Electronic communications services and networks

Indicate below the electronic communications services and/or networks provided by your company by stating the type of technology used and the type of client this service or network is destined for.

If there has been no change since last year, tick the box.
